Science is about challenging assumptions.
Questions have become uncomfortable answers.
Speculation has become truth.
Conspiracy theories have become spoiler alerts.
THE STORY WE WERE TOLD

There is a new and dangerous virus

It will kill many

The only way to stop it is with a vaccine

Till vaccines, people have to mask, social distance and lock down
People are starting to question everything
CHAPTER 1
Threat and Lockdown
Has there been an epidemic in Canada?
TOTAL DEATHS PER 100,000 POPULATION, CANADA JULY 2011 - JULY 2021

Is this type of fluctuation really abnormal?
Did lockdowns save Sweden?
Sweden

Swedes rapidly losing trust in Covid-19 strategy, poll finds

Political parties demand strategy be reviewed before election in 2022

Coronavirus live

Covid: Sweden ‘should have clamped down harder’ as pandemic hit; US set to ease mask guidelines - as it happens

Now closed. You
SWEDEN: DEATHS PER 10,000 (AGE AND GENDER ADJUSTED)
CORRELATION BETWEEN LOCKDOWN STRINGENCY AND MORTALITY
“Lockdown policies are ill-founded and should be rejected as a pandemic policy instrument.”
CORNERSTONES OF THE TRANSMISSION NARRATIVE:

Asymptomatic spread

Droplet and fomite contact (spittle-and-surface)
TRANSMISSION OF 2019-NCOV INFECTION FROM AN ASYMPTOMATIC CONTACT IN GERMANY

16 subsequent cases following exposure to Chinese colleague claimed to be asymptomatic

5 MARCH 2020
“There is no evidence of viral infectivity or transmissibility via fomites to date but no studies to date have been found to be methodologically robust and of high enough quality to even adequately address the question.”
THERE IS MORE EVIDENCE ON SPREAD BY AIRBORNE AEROSOL PARTICLES

Small enough to pass through masks and don’t obey gravity
Members of the Scientific Pandemic Influenza Group on Behaviour (SPI-B) warned in March 2020 that ministers needed to increase “the perceived level of personal threat” from Covid-19 because “a substantial number of people still do not feel sufficiently personally threatened.”
mala aria
meaning “bad air”;
from Latin

</table>

Note: Omicron X-day is the day that Omicron became dominant. Death rates are measured in terms of deaths/day/million population. Delta deaths are total death from 7/1-12/1/21. Omicron deaths are deaths measured from 1/1/22 to the current date. Vaccinated and boosted are percentages of the total population fully vaccinated or given the booster shot.
Maybe the absence of debate & questioning made it seem that there is “overwhelming evidence”
Should we be mandating new and experimental products without high-quality evidence?
What should we do now?
Science is about challenging assumptions from both sides, not about spouting marketing lines.
