

It doesn't matter

Stop getting distracted by the sideshows

DR AH KAHN SYED

It's been an interesting few weeks in the "COVID conspiracy™" arena (yes that's us, apparently). Reports of infighting abound - which is bizarre because most of what we have been predicting has come to fruition, particularly the Iatrocide fomented by governments with a combination of [lockdowns, masks and the worst vaccines ever](#).

iatrocide (*countable and uncountable, plural iatrocides*)

1. The act of killing a patient by medical treatment. [quotations ▼]

So, you would think that "Team Reality" (aka [#mousearmy](#)) would be chilling on a beach sipping margaritas from their "told you so" mugs.

Not so, apparently. If we haven't suffered enough over the last three years of medical and scientific fascism. Our beach margarita ended up more like

So I thought it was a good time to put out a short message.

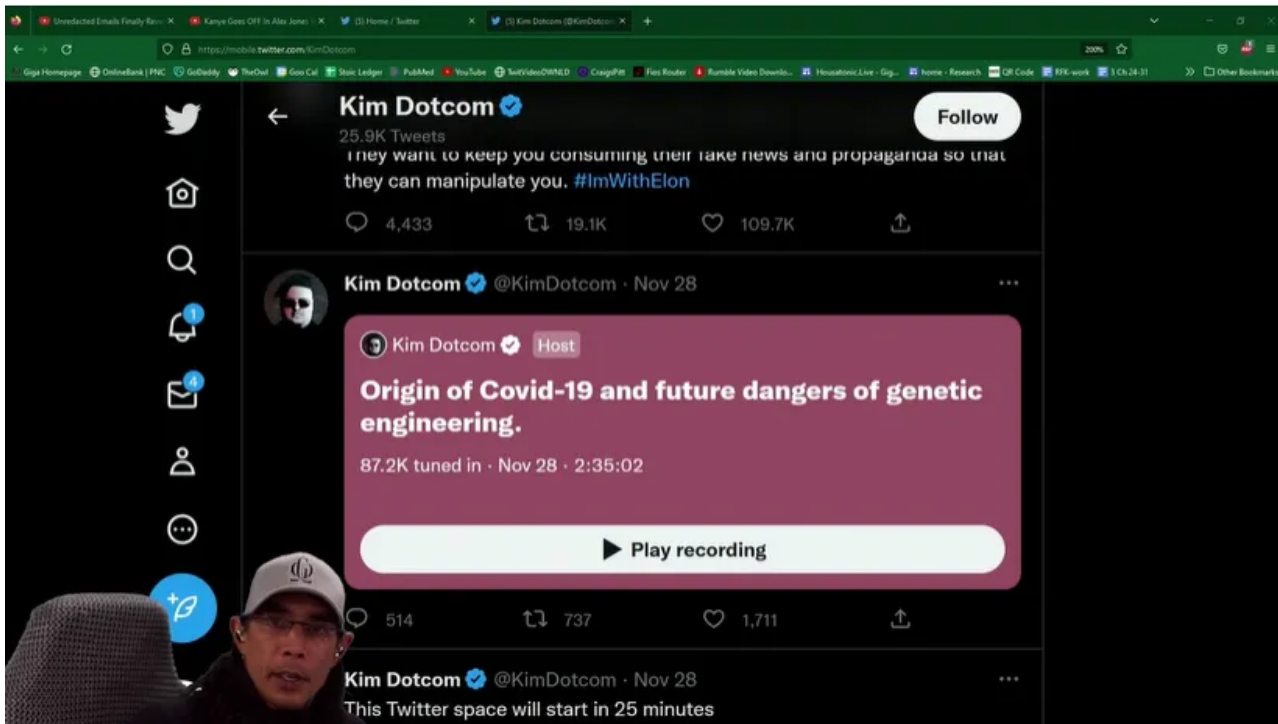

Stop being distracted.

All the infighting is Kabuki theatre. It always was. And it doesn't matter. No, seriously, it doesn't matter.

WHAT DOES *KABUKI THEATER* MEAN?

Kabuki is a form of classical theater in Japan known for its elaborate costumes and dynamic acting. The phrases *Kabuki theater*, *kabuki dance*, or *kabuki play* are sometimes used in political discourse to describe an event characterized more by showmanship than by content.

It doesn't matter that JJ Couey was criticising his good friend Charles Rixey on his stream - because both of these guys are right. Charles is right that the viral sequence released as the "origin of the pandemic" was manufactured. And JJ was right that such a virus cannot create a lethal pandemic alone.

It doesn't matter that Michael Senger misinterpreted the spat on his substack and declared JJ to have “rejected the lab hypothesis” - because he didn't. He just said it didn't matter because they could never have made a virus transmissible and lethal enough to cause the “worst pandemic ever”. What that means is, that coronaviruses like this - even if you can get them to cause a local outbreak - don't have the genomic stability to traverse the world maintaining their virulence. Well, at least not without the same kind of help that [MERS required to produce multiple outbreaks around the world](#).

The New Normal

DRASTIC Founder Renounces Lab Leak Theory of COVID's Origins

A bombshell has emerged in the debate on the origins of COVID, with J.J. Couey, one of the original founders of DRASTIC—a grassroots group assembled to investigate SARS-CoV-2's origins—renouncing the lab leak theory, saying he now believes the lab leak theory represents a kind of controlled opposition or “double bluff” in order to perpetuate the pandemi...

It doesn't matter that Alex Berenson thinks those that believe [Ivermectin has antiviral activity are deranged loons](#) - because the [evidence base is so strong](#) that Berenson ended up with egg on his face and those paying attention don't have to pay attention to him any more.

It doesn't matter that the [Kassam vs Hazzard](#) case was "lost". What mattered was that the case highlighted the abject failure of the courts that led to the judge, Robert Beech-Jones, telling the population that "coercion is still consent". It matters that Tony Nikolic put a stake in the ground showing that the courts **knew**:

- the vaccines did not reduce transmission
- infection rates were higher in the vaccinated
- the evidence to justify lockdowns, masks and vaccines did not exist
- the TGA [lied that they had a lawyer in the court](#) to hide the fact that Pfizer's barrister was acting on their behalf
- [deaths had been reported](#) from administration of the COVID vaccines
- the main expert witness for the government received \$65m in government grants and had never treated a COVID patient

It doesn't matter whether ivermectin "works" or doesn't "work" in COVID and any other viral infection. What matters is that the doctors that were using ivermectin - like Pierre Kory, Brian Tyson, Zev Zelenko and Lynn Fynn - actually bothered to treat the patient not some anonymous protocol. Which meant that their patients also got antibiotics to treat the secondary pneumonia that was actually the cause of elderly deaths.

Jikky the mouse 🐭
@TheJikky

3 tablets. That's what they withheld from the elderly that were diagnosed with "COVID pneumonia" because they were told not to treat. It was bacterial pneumonia. They died. If they hadn't had the test they would have had the tablets. #3tablets [drugs.com/mtm/azithromyc...](https://www.drugs.com/mtm/azithromyc...)

What does matter then?

What matters is what we know.

Work out what you know and the rest is irrelevant, because there is enough there to make a case for mass arrests of people in government who conspired to a democide.

This is what we know:

1. More people died in April 2020 and January 2021 than would normally have died
2. In some countries the overall death rate was normal for 2020 which means the impact of the “pandemic” was either minor or a “pull forward” effect
3. Labs performed PCR tests for a strand of RNA, and in some people that was positive
4. These PCR tests were more likely to be positive at the time that there were deaths
5. The primers for these PCR tests were commercial (except in NSW in 2020) and therefore we do not know what they were testing

6. The primers for the first PCR tests in China ¹ were wrong and therefore could not have tested for “SARS-CoV-2”:

Forward primer: 5'-TCAGAATGCCAATCTCCCCAAC-3'

Reverse primer: 5'-AAAGGTCCACCCGATACATTGA-3'

Probe: 5' CY5-CTAGTTACACTAGCCATCCTTACTGC-3'

7. The protocols for managing post-viral pneumonia were changed in April 2020 to remove antibiotics

Jikky the mouse 🐭
@TheJikky

HOLY CRAP.

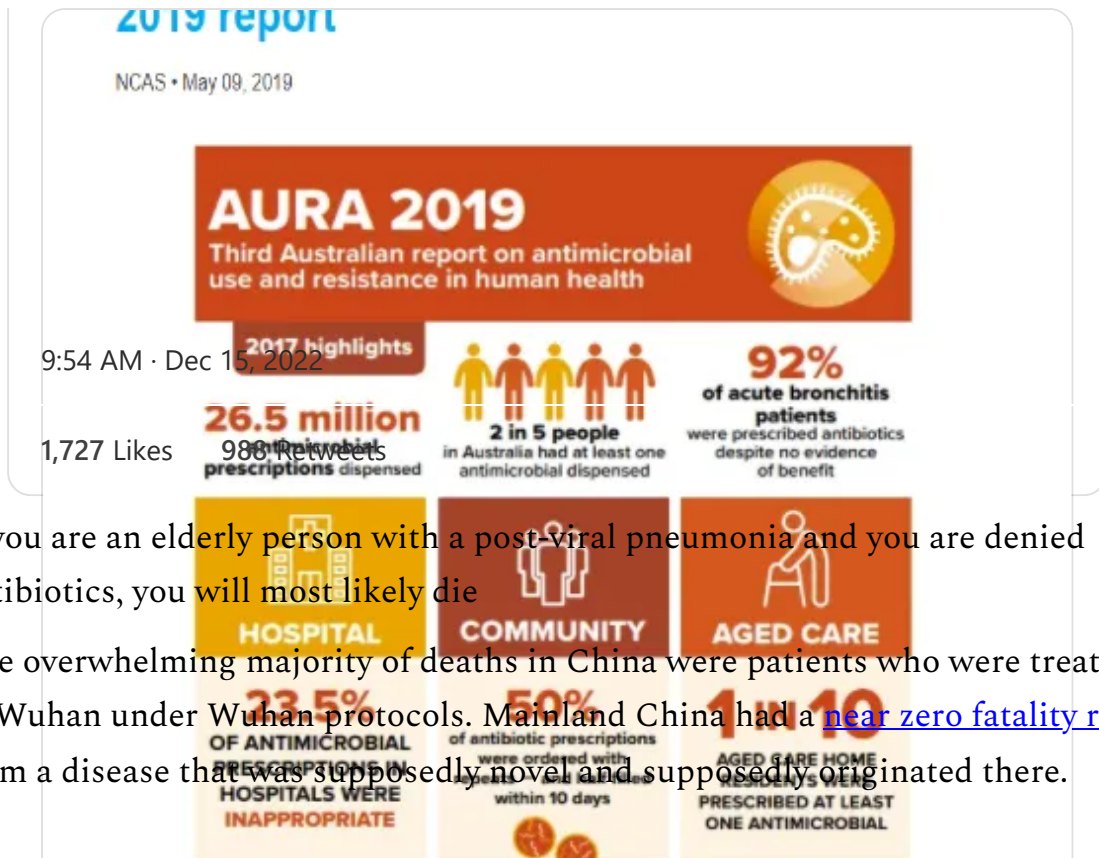

Why did doctors readily accept not treating 80 year olds for post-viral pneumonia in 2020-2022, when it had been standard of care prior?

Because they were told to in 2019.

By an institution called...

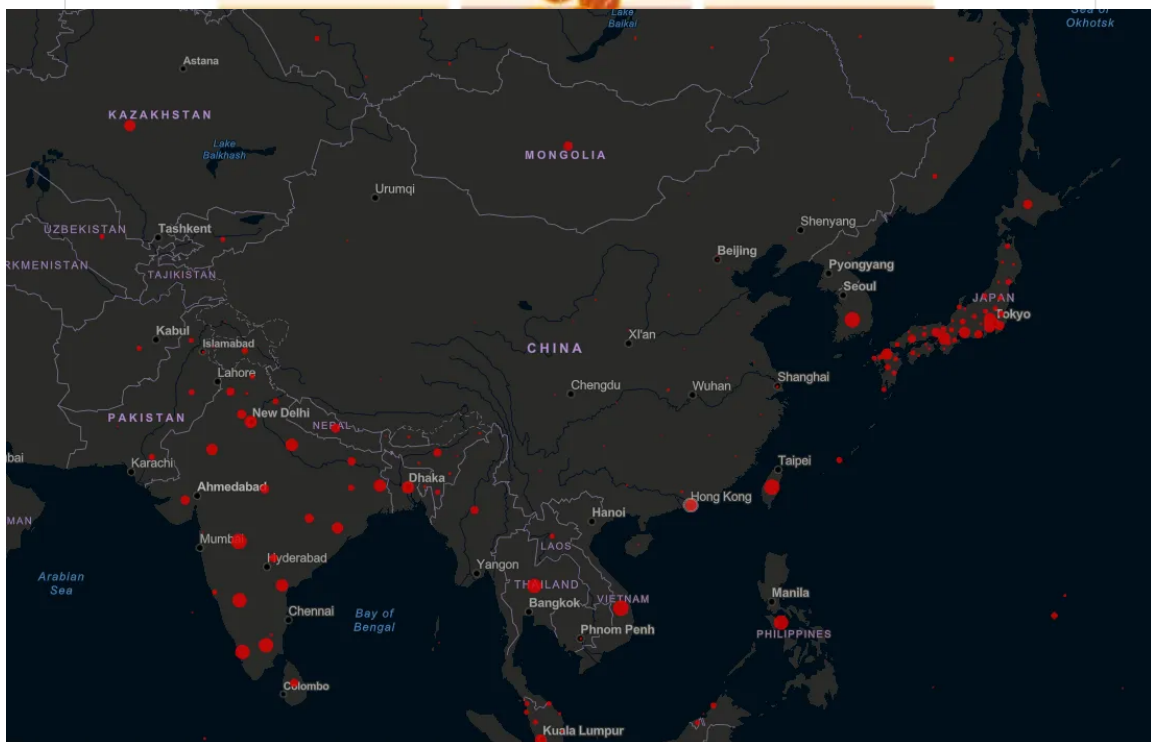

[You're gonna love this....]

@EduEngineer @joshg99

8. If you are an elderly person with a post-viral pneumonia and you are denied antibiotics, you will most likely die

9. The overwhelming majority of deaths in China were patients who were treated in Wuhan under Wuhan protocols. Mainland China had a [near zero fatality rate](#) from a disease that was supposedly novel and supposedly originated there.

10. The same disease outside of Wuhan (Hubei) had a [7.5x lower risk of death](#)² than the disease occurring in Wuhan (Hubei). This is not possible by chance³

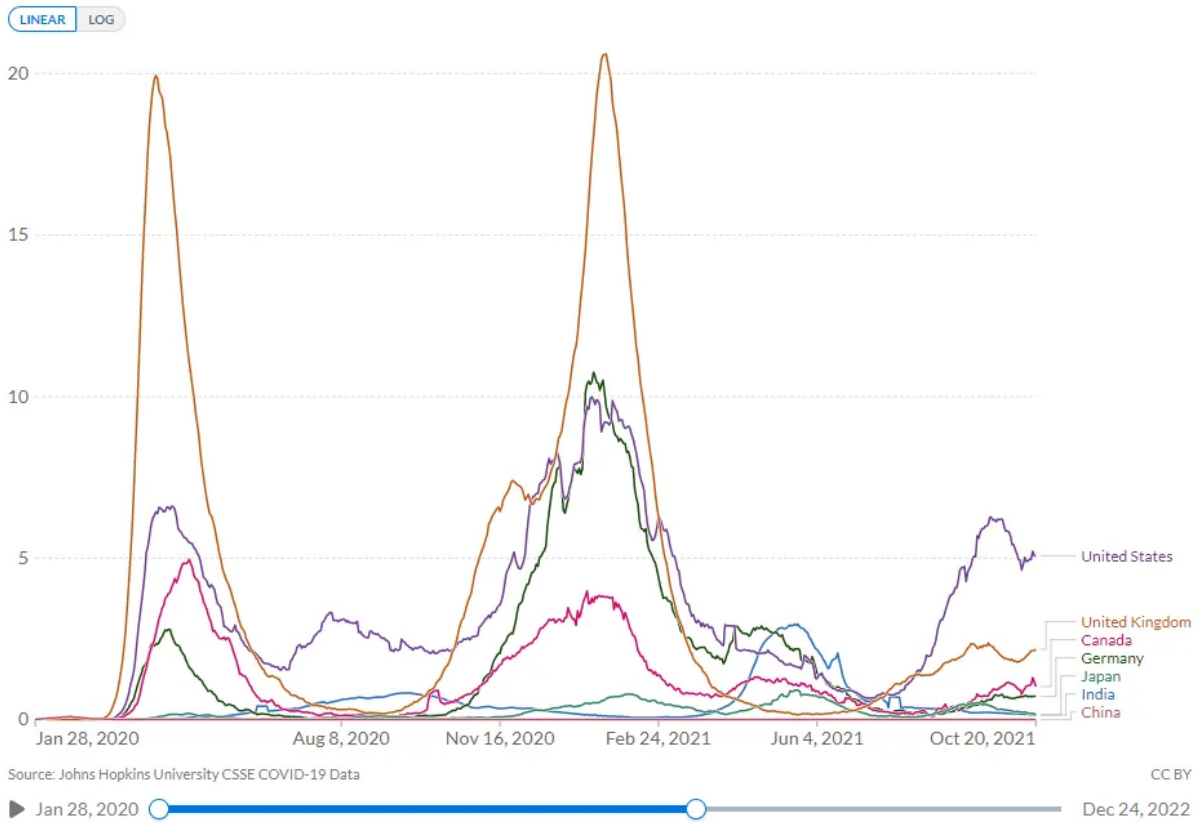

TABLE 1. (continued)

Baseline characteristics	Confirmed cases, N (%)	Deaths, N (%)	Case fatality rate, %	Observed time, PD	Mortality, per 10 PD
Province					
Hubei	33,367 (74.7)	979 (95.7)	2.9	496,523	0.020
Other	11,305 (25.3)	44 (4.3)	0.4	165,086	0.003
Wuhan-related exposure*					
Yes	31,974 (85.8)	853 (92.8)	2.7	486,612	0.018
No	5,295 (14.2)	66 (7.2)	1.2	71,201	0.009
Missing	7,403	104	2.8	103,796	0.010

11. China - the supposed epicentre of the “novel untreatable coronavirus” had the lowest COVID mortality rate per million population in the world in 2020 and 2021. This is not possible with the story as presented.

Daily new confirmed COVID-19 deaths per million people

7-day rolling average. Due to varying protocols and challenges in the attribution of the cause of death, the number of confirmed deaths may not accurately represent the true number of deaths caused by COVID-19.

Our world in data deaths per million for 7 countries. China is the flat (undetectable) line at the bottom.

12. On the basis of the “novel coronavirus pandemic with a high fatality rate” the whole world (everywhere but China) was subjected to:

- a. Lockdowns (that didn't work)
- b. Mask mandates (that didn't work)

c. Forced vaccinations with experimental gene therapy vaccines (that didn't work and [caused more deaths than the pandemic ever could have](#))

13. On the basis of the “pandemic” arising from China, which did not affect China in any appreciable way, the world’s economies were shut down and you are still living with the consequences.

14. For some people the forced vaccine mandates and government interference with medical treatment resulted in death. That is the reality. The removal of antibiotics from standard post-viral pneumonia was done in lockstep around the world. How could this have happened? By MAGIC: A consortium driven by the University of Liverpool and WHO.

The screenshot shows the MAGIC Evidence Ecosystem Foundation website. The header includes the MAGIC logo, a navigation menu with 'Create an account', 'Help', 'MAGIC', 'Resources', 'English', and 'Login', and a search bar with 'COVID-19' entered. Below the search bar, there are several search results for COVID-19 guidelines. Each result includes a logo, the title of the guideline, the version number and date, the number of recommendations, the number of clinical questions/PICOs, and an 'Options' button. The results are as follows:

Organization	Guideline Title	Version/Date	Recommendations	Clinical questions/PICOs
Sundhedsstyrelsen - Sundhedsstyrelsen	Nationale kliniske anbefalinger om brug af lægemidler ved forebyggelse og behandling af covid-19	v0.5 - 12/9/22	89	68
National Clinical Evidence Taskforce - COVID-19 - National COVID-19 Clinical Evidence Taskforce	Australian guidelines for the clinical care of people with COVID-19	v70.0 - 12/19/22 EXTERNAL REVIEW	191	88
National Clinical Evidence Taskforce - COVID-19 - National COVID-19 Clinical Evidence Taskforce	Australian guidelines for the clinical care of people with COVID-19 - drug treatments not recommended outside of clinical trials	v6.0 - 12/19/22 EXTERNAL REVIEW	60	67
World Health Organization (WHO) - Dr Francois Lamontagne and Dr Michael Jacobs (GDG co-chairs)	Drugs to prevent COVID-19: A WHO living guideline	v3.1 - 3/2/21	3	1
World Health Organization (WHO) - World Health Organization (WHO)	Clinical management of COVID-19 patients: living guideline	v5.0 - 9/15/22	112	18
World Health Organization (WHO) - World Health Organization	Therapeutics and COVID-19: living guideline	v12.2 - 10/6/22	44	66

15. Those COVID deaths did not need to happen. The people affiliated with Andrew Owen of MAGIC were [exposed by Tess Lawrie as admitting to undue financial influence](#) in rejecting ivermectin as a therapeutic. But ivermectin was just a part of the problem, because the ivermectin protocols came with antibiotics (doxycycline or azithromycin) which is what prevented the bacterial pneumonia.

So what actually happened?

The following is my assessment of the situation taking into account the above **known facts**. You are welcome to disagree and the comments are open. I encourage you to attempt to rebut this.

There was never a pandemic of any lethal virus. The sequences made by Baric, Daszak, Shi and their buddies in virology labs around the world are viral sequences of RNA, but they are synthetic. They can be effectively distributed via clones ⁴ (lab based production of RNA sequences) rather than letting an unstable real-life RNA coronavirus loose on the world, which would likely regress and flop as a bioweapon. What they proposed (a scary novel lethal coronavirus causing a pandemic) is nigh on impossible, **but the scare was real**.

In order to persuade people of a lethal pandemic virus, the CCP (who dictate medical protocols) in Wuhan allowed the release of a viral clone that caused disease leading to bacterial pneumonia. They then either withheld antibiotic treatment from cases in Wuhan only (killing people), or only reported the cases that had failed to respond to antibiotics (producing a selection bias in reports). Either way, this produced an artificially inflated death rate amongst cases in Wuhan that was not replicated in the rest of China. Thus **the fear of the pandemic** was born.

Once cases of viral infection (which might just have been circulating coronaviruses, because the PCR tests were not specific enough to detect “COVID” only) were seen in other countries, propaganda was mobilised (seeded by the CCP and lapped up by the West via Tony Fauci) to make sure that antibiotics normally used in post-viral pneumonia were **not** used in “post-COVID” pneumonia. There was no medical reason for this, only political. The political reasoning was to ensure that the populations were scared enough of the scary virus to accept lockdowns, masks and then experimental vaccines. None of those should have happened because they were not in the [pandemic plans](#) created prior to 2020. Remember too, that none of the Chinese lockdowns were real. All of it was propaganda.

Michael P Senger
@MichaelPSenger

When you take a step back and look at the entire world shutting down, masking up, tossing away human rights in lockstep after China supposedly beat a super-virus with fake videos of residents falling dead by locking down one city, the lockdown fraud looks embarrassingly obvious.

3:25 PM · May 5, 2021

2,565 Likes 844 Retweets

The masks were propaganda to keep the fear alive. The lockdowns were designed to neutralise non-Chinese economies, such that the [only economy that grew](#) in 2020 was China's. Once those two pillars of the fake pandemic had been implemented, the pathway was laid for the introduction of the "emergency" vaccines, for which the [mRNA gene therapy technology was ready to be used](#).

Instead of pushing back against the CCP propaganda, the West continued down the same fake pathway. They ignored the fact that mainland China [refused mRNA vaccines](#). They mobilised people like Gideon Meyerowitz-Katz whose lab is openly affiliated with the Chinese CDC ⁵, to push the lockdown, mask and vaccine propaganda.

Health Nerd
@GidMK

The WHO doesn't recommend masks for non-medical people to prevent #COVID2019 #coronavirus spread

Why?

Things I've seen people do while wearing masks:

- touch face
- pick nose
- lick food off finger

etc etc etc

1:51 pm · 26 Feb 2020

Health Nerd
@GidMK

The best part about this tweet is that while I was having that discussion I was also "defending" masks as an intervention to someone who thinks they don't work but of course that's not enough for the bizarre extremists!

5:30 a · 3 Dec 2022

In doing so, the world fell in line with the global dictats supplied via the MAGIC app protocols which told doctors not to use antibiotics in post-COVID pneumonia. And in doing that, the world's doctors collaborated - knowingly or unknowingly - in a worldwide Iatrocide that was likely entirely preventable.

The protocols touted by Zelenko and Kory were simple. Hydroxychloroquine or ivermectin (which are anti-inflammatory or anti-viral in the early phase), zinc (which is anti-viral) and doxycycline or azithromycin (which prevents or treats the secondary pneumonia, the cause of death in the majority of cases of “COVID”). Some of the safest drugs on the planet. Yet we weren’t allowed to use them, because the WHO, Fauci and Andrew Owen said so. And then the government stepped in to restrict their prescription.

The hydroxychloroquine or ivermectin may not even have been that important. Most likely, all it needed was the “[#3tablets](#)” of azithromycin which represents a course of treatment for community acquired pneumonia. Less than a dollar in many countries. If you had a negative “COVID test” you would be given those tablets. If you had a positive test, you weren’t allowed them. An elderly person with an untreated post-COVID pneumonia was set on a pathway to death.

One dollar. 3 tablets. That was the price the WHO set as too high to treat your elderly relatives.

I guess the WHO’s director Tedros gives too much away in this picture. But then again, this is not his first democidal rodeo, having been the health minister who oversaw the [systematic health discrimination](#) highlighted in Human Rights Watch’s [2010 report](#).

But sure, everything he does now is purely to protect granny.

1 dollar. 3 tablets. Wear a mask. Take your vaccine. Stay indoors. Don't listen to reactionaries. Just comply. It's for your safety.

One last question... who are we supposed to be healing this time round?

- 2 Here is the paper from the China CDC. Remember when reading this that only papers approved by the CCP are allowed into the public realm. This means that either the IFR in Hubei was higher than the rest of China or the CCP wanted the world to believe that the IFR in Hubei was higher than the rest of China. It doesn't matter. It means that people were denied medical treatment to promote an idea that there was a scary coronavirus pandemic coming.

Malignant Dissident Army Dec 25, 2022 Liked by Dr Ah Kahn Syed

The first goal is to get the vaccine halted
Second goal is to get those fired all reinstated
Third goal is to hold the bastards accountable.
It doesn't even have to be in that order.
Absolutely no reason for infighting.

The COVID phenomenon cannot be understood without understanding the un-televised 2019-2020 unprecedented financial collapse threatening the entire global financial system. The COVID fraud timing became necessary as world markets were faced with an emergency debt crisis that popped up in formerly mostly liquid markets: Repo markets, money markets and FX markets.

Covid Is Not An Epidemiological Story; Covid Is A Crime Story.

There are a handful of quasi-public voices that are essential viewing/listening in order to understand the totality of what has happened, (and what led into it) over the past three years- Catherine Austin Fitts sits at the top of the list.

Here is a recent interview w/CAF:

<https://celiafarber.substack.com/p/catherine-austin-fittswere-now-staring>

A few others that I would put on that list are Denis Rancourt, John Rappaport, Paul Schreyer, Ernst Wolff, Kit Knightly, Simon Elmer, Leslie Manookian, Kevin Corbett, Andrew Wakefield, David Crowe (RIP), Sheri Tenpenny, Jacob Levich, Tom DiFernando, CJ Hopkins, David Rasnick and a few others.

There were many others that are not in the public eye who were screaming from the rooftops and actively working to expose this fraud as early as January 2020.

While I am not casting doubts on many of the more visible of the 'Covid sceptics' (this terminology hardly captures it) those who have the highest visibility, such as RFK, Bigtree, Kirsch, Malone, GVB, Bret Weinstein, Bhattacharya, Berenson, Kuldorff, Ryan Cole, Pierre Korv et al will simply never- NEVER- bring the reader to a comprehensive understanding
