**WHY CHILDREN AND YOUNG PEOPLE DON’T NEED A COVID-19 INJECTION**

Children and young people have a mostly mild illness or no symptoms when infected and have near-zero risk of death from Covid-19.

Some side-effects of the Covid-19 injections are more common in the young, especially myocarditis which can damage their heart permanently.

**MUST ADULTS GET THE COVID-19 INJECTION?**

Children and young people should not be used for protecting others. Children are also less likely to pass on the virus than adults.
